

I do not believe that the airing of the anti-kerry documentary is the right thing to do. I would not even agree with it even if it was a anti-bush documentary. It is a prime example of the miss use of the large media groups to control the airwaves. I believe that the FCC should send a message that the media and airwaves are not controled by one large group like sinclair broadcast. The FCC should stop them and I know you have the power to.

Thank you
